Cheryl,

I decided that that unnamed tributary wasn't suitable for use as Spud Creek as the course crossed cranberry fields rather reflect the true channelization around the fields I could see on the aerial photo . The 1st attachment compares the two versions of Spud Creek (forgive the misspelling -> Spuds instead if Spud), and the 2nd attachment is the map I sent you yesterday updated to include Spud Creek.

I'll now add in the fall application fields and nutrient impaired waterbodies.

Milo

Subject: Spud Creek

Cheryl,

Look at the attachment. NHD has an unnamed tributary to Cranberry Creek start just south of field N27. Should I just call this tributary 'Spud Creek' on the map?

Milo
